

Data Flow and sharing within and outside DRIVE C2X

- Can we agree on general principles for sharing data? Between FOTs, EU-US?
 - Yes we can
 - Data are very costly to obtain!
 - FOTs should **complement** each other – **not compete!**
 - Agreements must be based on mutual benefits
- Are there legal and ethical issues related to data sharing of CS FOTs?
 - Personal data, activity data, “broadcast” of information
- What are the necessary elements to put in place for practical data sharing?
 - Open “interfaces” along the processing chain from logging to impact assessment: content, metadata, access and format
