

FOT- Net Data

**Transport Safety
Research Centre**

FOT-Net Data Transport Safety Research Centre

What do you expect from FOT- Net Data?

- A forum for sharing experiences
- Opportunities for collaboration with other partners
- Development of common data collection protocols?
- Advice and support regarding the reuse of data including how to handle this in the project development phase – ‘smoothing the way’ with data sharing agreement
- An inventory of available FOT and ND data available to the research community

What do you have to offer?

- Experience running FOT and ND studies
- Experience analysing FOT and ND data
- Experience of video annotation
- FOT and ND data to share (?)
- Accident investigation, accident causation and accident data analysis

FOT-Net Data Transport Safety Research Centre

What will be the benefits and the obstacles of data sharing?

- Greater potential for pure and applied research
 - Variety and depth data for development of analysis techniques
 - Rich data for understanding driver behaviour
 - Variety and depth of data in support of product development
- Comparability and compatibility of data
- Long-term database management and data storage
- Third party access beyond initial project partners
