

FOT-NET DATA

First workshop

Amsterdam, 19.03.2014

T. Alkim, Rijkswaterstaat, tom.alkim@rws.nl

FOT-Net is a support action co-funded by the European Commission to network FOT activities at European, national and international level.

RIKSWATERSTAAT

Transition routes

REISINFO

1 From collective influence to a smart mix of collective and individual services

STAND ALONE

2 The changing role of roadside systems

COÖPERATIEF

3 From local/regional to national coverage for road traffic/travel information and traffic management

B2G

4 From business to government (B2G) to business to consumer (B2C) and business to business (B2B)

B2C
B2B

5 From ownership of data to maximum openness and availability of data (public *and* private)

6 From government supervision to public-private collaboration and alliances

WHAT DOES RWS EXPECT?

- Learning from other partners
- Hands on experience of all aspects of data sharing
- Specifically in the context of C-IST
- State of the art knowledge regarding technical and non-technical issues regarding data sharing
- ...

WHAT DOES RWS HAVE TO OFFER?

- Experience in providing data (traffic management, ...)
- Experience in the Netherlands with National Data Warehouse
- Action program where a transition path is to move towards more open data
- ...

BENEFITS AND OBSTACLES OF DATA SHARING?

Benefits

- Reduced costs
- ...

Obstacles

- Not every stakeholder's interest is open data
- Strict conditions for sharing (privacy, security)
- ...
