

INTERNATIONAL WORKSHOP

CONCLUSIONS

Yvonne Barnard ERTICO – ITS Europe, y.barnard@mail.ertico.com
Tokyo 14/10/2013

FOT-Net is a support action co-funded by the European Commission to network FOT activities at European, national and international level.

CONCLUSIONS

- On the way to deployment:
 - Systems
 - Results
 - Data
 - Knowledge and experiences
- Some systems and services are already deployed, for others the road is still long
- Many obstacles, many opportunities
- Obstacles may be technical, organisational and business related
- Opportunities are related to the need that is expressed by many stakeholders to improve safety and services
- Countries and regions are learning from each other
- New partnerships are forming
- Share FOT data!!!
- We all invite you to stay in touch!

WE'LL SEE EACH OTHER...

FOT-Net at ITS World Congress

Special Session SIS 04 Analysing the Outcomes of Field Operational Tests

- **Tuesday 15 October, 11:00-12:30**
- **At the ERTICO stand 122**

10th Stakeholders workshop, on naturalistic driving

- **Brussels, 26 November 2013**

In January 2014 in FOT-Net Data

AND A BIG THANKS!!!

- To our Japanese hosts
- The Dutch embassy
- The panellists

- TO YOU ALL!!!

(and don't forget your feedback sheet)

THANK YOU!

What are Field Operational Tests?

Field Operational Tests (FOT) are large-scale testing programmes aiming at a comprehensive assessment of the efficiency, quality, robustness and acceptance of ICT solutions used for smarter, safer and cleaner and more comfortable transport solutions, such as navigation and traffic information, advanced driver assistance - and cooperative systems.

More about Field Operational Tests

What is FOT-Net?

The FOT-Net project aims to create a networking platform for anyone interested in Field Operational Tests, their set-up and their results.

This month's featured FOT: Compass4D

Plotting Cooperative Services for Deployment

Seven European cities/regions (Bordeaux, Copenhagen, Eindhoven-Helmond, Newcastle, Thessaloniki, Verona and Vigo) have united their forces in addressing road safety issues, traffic efficiency problems and the negative environmental impacts that road transport currently brings. These cities, together with the rest of the industrial and research partners from the Compass4D consortium, strongly believe that cooperative mobility solutions can bring benefits to the key stakeholders and improve the lives of their citizens.

More information on: [Compass4D](#).

Frequently asked questions

The FOT Catalogue

With the aim to involve all experts, FOT-Net has created the FOT Catalogue to which everyone can contribute. It is an online list of past and present FOT activities for anyone interested in FOTs, their methodology, their set-up and their results.

With this Wiki pages, we aim to build up a catalogue of information about various past, current and planned FOT tests in Europe, North-America and the region Asia. You can help us build the FOT Catalogue by listing your field test in this catalogue, enriching information about your field test in this catalogue.

If your Field Operational Test is not listed and you would like to add a page, please use the FOT template

You can copy the code and headings and create a new page based on the defined template.
